

# COSMETIC Regulatory Solution

Global cosmetics manufacturers need to ensure that their products have been tested and are safe for consumers prior to marketing. All ingredients must be listed on the product label and comply with pertinent regulations. In the EU, the EU Cosmetics Directive 76/768/EEC is the primary regulation. The American cosmetics industry is regulated by the U.S. Food and Drug Administration (FDA).

Lisam Systems' collaboration and relationship with IFRA ensures that the latest information and guidelines are always updated for ongoing compliance with the IFRA 47th amendment and the IFRA standards.

*Lisam's collaboration with IFRA ensures your cosmetics reports, leaflets, labels, and allergen reports are always in compliance.*

# COSMETIC Regulatory Solution

## ExESS® IFRA Cosmetics Module

Lisam's ExESS solution offers a specialized module for the cosmetics industry that easily integrates the regulatory lists, report templates and certificates established by the major cosmetic industry associations in the EU and North America.

The ExESS IFRA Cosmetics Module enables a regulatory status assessment that performs calculations using integrated cosmetic regulation data in three languages and six chemical reference lists, to cross match product calculations. It generates cosmetics reports, leaflets, labels, allergen reports and official IFRA Certificates.

### Module Features:

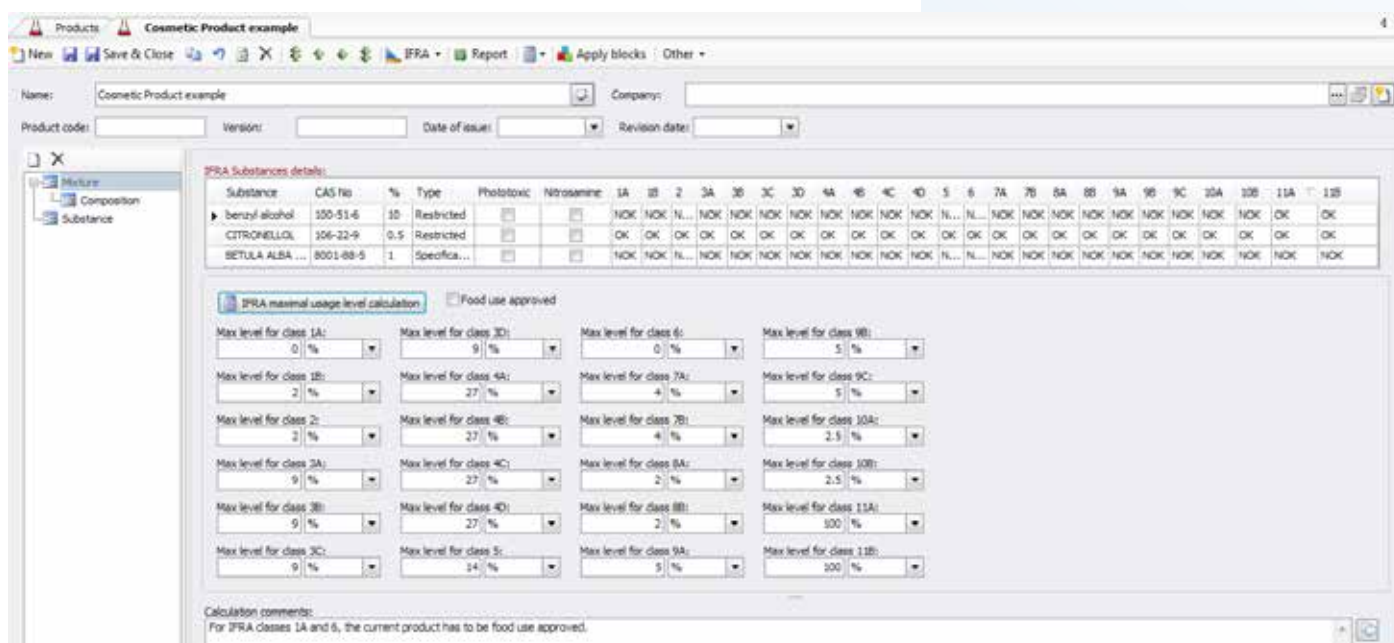

- List of allergens (EU)
- CosIng 2 database (European Commission)
- List of forbidden and restricted substances
- List of authorized colorants, preservatives and UV filters

### Substances databases included:

- IFRA substances database
- NVZ list of substances
- INCI list

### Main reports:

- Generates cosmetics reports
- Cosmetics leaflet
- Specific cosmetic label layouts
- Technical report
- Allergens report
- IFRA certificate
- Cosmetic labels

The screenshot displays the 'IFRA Substances details' window. It features a table with columns for Substance, CAS No, %, Type, Phototoxic, Nitrosamine, and various IFRA classes (1A through 12B). Below the table, there are input fields for 'IFRA maximal usage level calculation' and 'Food use approved'. The 'Calculation comments' section at the bottom states: 'For IFRA classes 1A and 6, the current product has to be food use approved.'

| Substance      | CAS No    | %   | Type         | Phototoxic | Nitrosamine | 1A  | 1B  | 2    | 3A  | 3B  | 3C  | 3D  | 4A  | 4B  | 4C  | 4D  | 5    | 6    | 7A  | 7B  | 8A  | 8B  | 9A  | 9B  | 9C  | 10A | 10B | 11A | 12B |
|----------------|-----------|-----|--------------|------------|-------------|-----|-----|------|-----|-----|-----|-----|-----|-----|-----|-----|------|------|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|

## ABOUT Lisam Systems

Lisam Systems is an established international provider of Environmental Health and Safety (EH&S) compliance management software solutions and services. Our flexible, user-friendly and cost-effective solution empowers over 800 clients and EH&S teams worldwide to reduce their costs, improve processes, and minimize the risk of non-compliance with global regulations, such as GHS and REACH.

Our enterprise-wide solution, ExESS<sup>®</sup>, creates, manages and distributes GHS-compliant safety data sheets (SDS) and labels for all major commercial markets. It leverages fully integrated regulatory and transportation content libraries and can generate output in nearly 50 languages. Specialized vertical compliance modules are also seamlessly integrated within ExESS, offering an automated solution and access to industry-specific regulatory information.
